Introducing PSCertify®, the web-based certification and testing system with fully customizable content.

Your staff needs to understand and demonstrate a mastery of constantly changing policies, procedures, regulations, and job requirements.

How can you be sure that they really know what they need to? Test them. Better yet, *certify* them.

PSCertify® is a powerful and flexible system that lets you test and track employee knowledge of your operational workflow processes and procedures. And PSCertify® is so easy to use and administer that you'll never even think of training or testing your team without it again.

PSCertify® will provide you with a permanent and always up-to-date record of employee performance while establishing an overall operational benchmark.

In fact, you can use PSCertify® to test and certify *anyone* who works with your organization:

- employees
- suppliers
- members
- volunteers

Using PSCertify® you can:

- define and implement your own certification program to meet your standards and requirements
- recertify your users as often as you need to (at no additional cost)
